CHRYSANTHEMUMS

CHRYSANTHEMUM INTRODUCTIONS FOR 1942

AGNES WALFORD—Golden Yellow Spoon—The fine texture and form will be appreciated by connoisseurs of something different and better in spoon type Chrysanthemums. Matures October 25th. Medium height.

JOHN BANKS—Semi-double flowered Orange Bronze Korean. Very hardy variety. This has been well tested and proven very valuable for an early cut flower. Matures October 10th.

FLORA E. WHITING—A beautiful white Pompom suitable for disbudding. Its greatest value is its flowering season, October 5th. Flower measures 2½ inches. Fine commercial variety of medium height.

MRS. WYNANT D. VANDERPOOL—Magnificent white single, very clear and each flower perfect form. This will be a great acquisition for a long needed early white single flower 2½ to 3 inches across. Matures October 5th.

W. STARKE—Lemon Yellow Pompom possessing excellent form and substance attains a diameter of 2 to 3 inches when fully developed. A vigorous grower. Matures December 10th.

LARGE FLOWERING VARIETIES

EARLY OCTOBER—In size and color about the same as October Rose but blooms October 4th. Here is an early pink of midseason quality. Has abundant medium sized foliage and fine stem. Grows five feet from June planting. This variety should prove a boon to the grower who does not grow mums under shade. Take terminal bud for best color.

MONGOL—Might be styled an early Detroit News which it resembles except that the blooms build higher in the center. A fine golden bronze coming into flower by October 20th. Grows five feet from June planting. Good stem and foliage. Take terminal bud.

GLORIA—A fine late commercial yellow, blooming just right for Thanksgiving cutting. November 25th. Incurved bloom of large size and good substance. Good stem and foliage. Grows four feet from June planting. Take terminal bud.

DECEMBER WHITE—Should prove valuable to the grower who wants fine blooms in December without having to use artificial light for retarding blooming. The bloom is always clear white, large size, incurved and carried on strong stems. Holds fine on the plant or after being cut. Grows five feet from July 1st planting. Take terminal bud.

POMPONS

CHO CHO—Large button type pompon. Fine even shade of lavender pink flower the size of Pink Dot. Makes fine sprays and cuts heavily. Medium height. Blooms October 9th.

YELLOW-HAMMER—Bright golden yellow pompon to come in ahead of Golden Spray and Goldfinch. Blooms are same size as pink Dot. Medium height and produces heavily, making fine sprays. Good for shading.

FAIR MAID—Beautiful clear shade of daybreak pink. Something unusual in pompons and extremely valuable for making up. Sells on sight in our wholesale market. Blooms are 2½ inches in diameter and produced in fine sprays. Fine grower and blooms October 20th.

UNEEDA—Late pink pompons of good color and substance are sadly needed and always welcome. This variety should quickly make a place for itself for Thanksgiving cutting, its blooming date being November 25th. Grows to medium height and produces well.

ANEMONE

COLLARETTE—A white anemone with bright yellow cushion. The blooms are 2¼ inches in diameter and are produced in fine sprays and have a splendid substance. This should become a great favorite in the market because of its ability to withstand handling. Blooms November 8th and holds well.

SINGLE

AURORA—Here is a late pink single which will prove extremely valuable for cutting along with Garza Supreme. The blooms are three inches in diameter, bright pink with bright yellow disc. Grows four feet tall with strong stems and the yield is very heavy.

THE ABOVE VARIETIES—75c EACH—\$5.00 PER DOZEN

YUKON

AFTERGLOW—A small-flowered rust bronze Single. Flowers are 2-2½ in. in diameter with 6-8 rows of sturdy petals. Attains a medium height from June planting and forms a spray carrying a large head of flowers when last pinch is made about August 5th. An attractive Thanksgiving variety.

FLAMINGO—As the name implies its color really flames. The hue is scarlet red enhanced by a yellow base. This 3-in. Single possesses excellent substance and is easily grown to a medium height from June planting. An informal Single with its five rows of petals twisting attractively holding their color unusually well. Matures November 20th and later to be easily had for a Thanksgiving cut.

MASON'S RED—The color of this sport from variety Mason's Bronze is a true crimson with the base of the petal shading to an orange yellow. This variety we feel sure will be grown as extensively as its parent variety, which it resembles in all respects except color.

SARONG—A beautiful Single for mid-December to Christmas season. The color is a bright crimson scarlet. A heavy, vigorous growth habit. Produces large, well spread sprays on strong stems. Plant fairly early and receive a final pinch about August 1st. When well grown this is one of the best red Singles.

VAGABOND—A pleasing apricot buff Single. Flowers are about 2-2½ in. in diameter, with 4-5 rows of petals possessing fine substance. Blooms November 15th. Attains medium height from June 25 planting. Forms best spray from an August 5th pinch. Ships and keeps unusually well.

YUKON—A late clear white Single. Flowers about 3 in. in diameter with 5-6 rows of petals. Matures about December 10. A tall growing variety. Will produce a good yield of fine sprays from late planting and a final pinch about August 15th.

BRONZE FREIDA—Growth and foliage of this variety are the same as that of Freida. Flower color is a salmon buff with a light yellow overcast and a deep lemon yellow Anemone center. This is a very practical variety for both normal flowering and for shading purposes.

DARK PINK FREIDA—The striking color combination of its deep pink rays and the clear yellow Anemone center make this an unusually distinctive flower. Because of its growth characteristics which are identical with those of its parent, Freida, this variety will no doubt surpass all others in this color class.

WHITE FREIDA—Clear white ray florets with a lemon yellow Anemone center identical with that of its parent, variety Freida, make this an invaluable addition to the list of white Anemones for both normal flowering and for shading purposes. In all respects except color this variety is identical with Freida.

SALMON FREIDA—Beautiful shade of salmon pink, sport of Freida. Anemone type with all the growing and producing qualities of its parent.

WINTERSET

An intermediate, lemon yellow pompon which blooms December 25. Attains a diameter of 2 inches and possesses good substance. Of medium height from June planting with an August 5 pinch. Has a good growth habit.

BRONZE KIDDER—Bronze sport of the variety Mrs. H. E. Kidder. The inside of the petal a bright bronze with slight shadings of Chinese-red, while the reverse is an even shade of buff, making a desirable incurved early bronze of good substance. Matures October 25th from buds selected August 25th.

VIBRANT

A large decorative pompon. Matures about December 20. Color is a brilliant deep lemon yellow. Flowers attain a diameter of about 2½-3 inches when fully developed. A vigorous grower. Very productive. Does not come blind. Makes a fine spray from an August 5 pinch. An outstanding late yellow pompon.

NEW AMERICAN GROWN CARNATIONS

PEACE

per doz. 100

Parentage: Two unnamed seedlings.
Color: Pure White. Size: Slightly
larger than average—3 to 3½ in.

**Very fragrant—Full center and good
keeper.** Strong stem and good calyx.
No splits or inferior blooms. Easy grow-
er and good producer of both blooms
and cuttings.

PEACE is a good keeper and has
been shipped frequently to distant
points, Florida, California, and New Or-
leans, withstanding these tests most sat-
isfactorily. \$4.50 \$25.00

Not Patented—No Restrictions After One Year.

FIRE CHIEF (Patented)

"**FIRE CHIEF**" is a sport of "**King
Cardinal**," originated at Phil J. Goe-
bel's, Kirkwood, Missouri. It is deeper in
color and has about 25 per cent more
petals than "**King Cardinal**". Never gets
off color or streaky in cloudy weather.
Good producer, same as parent, but
little heavier grower 4.50 25.00

HELEN HUSSEY—Seedling. A beauti-
ful, clear salmon. Very free and a
lovely color. Not patented 4.50 25.00

IVANHOE—Seedling. Garnet with or-
chid edges. Markings are somewhat
similar to Lochinvar but more pro-
nounced. Very free flowering. Not
patented \$4.00 \$20.00

SILVERLYN—A superb seedling in all
respects. The color is a fine, medium
pink with silver edges. The flower is
3-3½ in. in size, well formed and very
full. Not patented. 4.50 25.00

ENGLISH CARNATIONS

MARCHIONESS OF HEADFORT— per doz. 100

Creamy white melting into a ground
color of rich red, of great substance.
A most beautiful and impressive flow-
er of the "Pelargonium" type, with a
pleasing perfume. The growth is con-
stitutionally perfect, absolutely relia-
ble, with a substantial stem and vig-
orous growth 4.50 \$25.00

SCARLET KING—A sport of Pelargo-
nium, bright red edged creamy white,
identically the same size of flower
and growth as Pelargonium, but more
outstanding in color 4.50 25.00
